

Hepatitis

S.#	Title of Project
1	Comparative evaluation of immunochromatographic rapid diagnostic tests (strips and devices) with ELISA for hepatitis B and C infection
2	Comparison of a rapid test with Enzyme Linked Immunosorbent Assay (ELISA) for the detection Hepatitis B surface antibodies.
3	Treatment of chronic Hepatitis C in Thalessemia patients
4	Response of antiretroviral therapy on HBV clearance in HIV patients co-infected with HBV - A follow up study
5	Determination of Hepatitis C (HCV) infection in spouses of index patients: a multi-centre study.
6	Seroepidemiology of the Hepatitis B antibodies in children born between 2004 and 2007 in Islamabad: A Pilot study.
7	Knowledge regarding diagnosis and treatment of HCV patients among Primary Health Care Physicians in Islamabad and Rawalpindi.
8	Knowledge, Attitude and Practice of qualified Dentists about Hepatitis.
9	Effects and results of counseling and educating the patients presenting with hepatitis at a tertiary care hospital.
10	Mother to infant transmission of antibodies against Hepatitis C virus (Anti-HCV) and its natural course: A pilot study.

11	Risk factors for viral hepatitis amongst the public sector health care workers of District health department Jamshoro.
12	Hepatitis B vaccination and measurement of antibody titers of the unvaccinated health care workers of a tertiary care hospital.
13	Assessment of Stigma among patients with hepatitis B and C residing in Islamabad
14	Frequency of Hepatitis A and E Virus infection, and other water borne infections among flood victims in Pakistan.
15	Assessment of Hepatitis B vaccination coverage in children under 5 years in two major public sector hospitals of Karachi.
16	A three years retrospective analysis of pregnant females suffering from Hepatitis E admitted in tertiary care public and private sector hospitals.
17	Frequency of anti-core antibodies and Hepatitis B surface antigen in blood donors and its implications on donor screening,
18	Frequency of HBV pre core mutant strains in HBsAg positive patients: a Multi-Centre Study.
19	Frequency of Hepatitis E in pregnant cases: A National prospective study
20	Exposure rate of Hepatitis E (IgG) among adult population in Pakistan (A national multi-centre study)
21	Evaluation of Dried Blood Spot (DBS) sampling technique for the diagnosis of HBV and HCV through serological and molecular technique: A Pilot Study
22	Economic burden of Type 2 Diabetes, Tuberculosis, Hepatitis B&C on patients visiting public sector hospitals (Multi-centre Study).
23	Knowledge and practices of gynecologists on the prevention of transmission of Hepatitis B & C from mother to child and assessing the stigma of infected mothers. A national study
24	Interfamilial spread of HBV among HBsAg positive parents And their children/siblings in rural community of district Peshawar

25	Comparison of ICT negative HBV & HCV blood donations with ELISA in public and private blood banks in Pakistan (A national study) (MCS)
26	Frequency of HCV RNA positivity and viral load in anti-HCV positive patients of Pakistan
27	Health related quality of life (QoL) and evaluation for depression among chronic HCV patients, before and after interferon plus ribavirin therapy
28	Comparison of Sensitivity and specificity of rapid anti HCV Multisure kit with gold standard anti HCV using ELISA.
29	Prevalence of Hepatitis B Virus (HBV) and Hepatitis C Virus (HC) in population of Rawalakot Azad Kashmir
30	Vertical transmission of Hepatitis C virus and its association with maternal viral load.
31	Efficacy of sofosbuvir and daclatasvir for the treatment of chronic hepatitis C in thalassemia major patients.
32	Mutation analysis of NS5b region of HCV in responder and non-responder patients to Sofosbuvir and Future Prospects.
33	Prevention and control of hepatitis B and C in two Union Councils of Sargodha through Community mobilization.
